STANDARD SERVICE AGREEMENT

BENEFITS OF A GRUNDFOS STANDARD SERVICE AGREEMENT COVER MOST CUSTOMER NEEDS

A service agreement gives you direct access to Grundfos' expertise and knowledge of pumps. There are a number of clear advantages, including reduced operating costs, increased pump life reliability and reduced downtime, all resulting in greater peace of mind.

As part of a Grundfos Service Agreement, one of our experienced technicians will visit your facility to assess the health of your pumps and systems. If repair work is required, our technician will carry out the work based on the terms of your agreement. This service is completely customizable and can be tailored to meet your exact needs — from annual checks to comprehensive monthly maintenance.

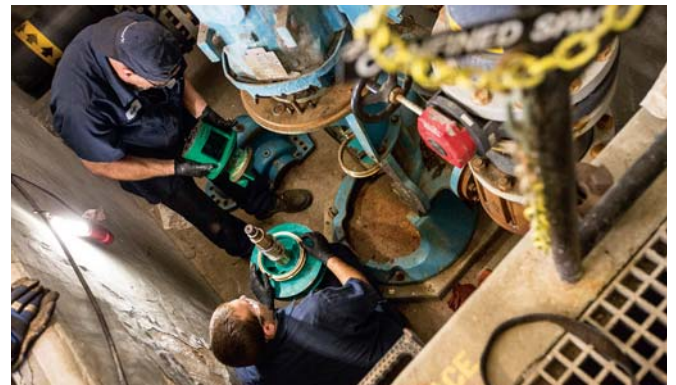

A service agreement is economically attractive since your annual operating costs are fixed and therefore predictable, providing the perfect basis for calculating your future finances. With a service agreement, your pump and pump systems always run at optimal performance.

All work is conducted by our experienced team of technicians or a Grundfos Authorized Service Partner. Our complete range of Grundfos brand, original equipment manufacturer spare parts, also means that any repair work conducted as part of your maintenance will be completed with the highest-quality materials.

SERVICE AGREEMENTS PROVIDE:

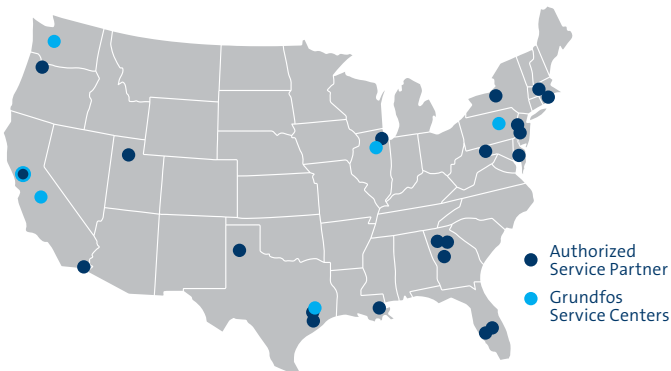

- ✓ A yearly report with an overview of your pumps' performance
- ✓ A thorough check of the wear parts and adjustments on your pumps to ensure optimal performance and prevent breakdowns
- ✓ Recommendations for improvements you can make to ensure long-term savings

Each year, our technicians will automatically schedule a preventative maintenance service at a date and time that suits you.

Grundfos offers exceptional service through our network of factory-authorized service centers and Authorized Service Partners (ASPs). We provide service to Grundfos brand pumps, including PACO, Yeomans, Chicago, Morris and Sewer Chewer, as well as any other brand you may have.

SERVICES WE OFFER

- ✓ On-site Repair
- ✓ Workshop Repair
