GENUINE OEM SPARE PARTS

MINIMIZE BREAKDOWNS WITH GRUNDFOS ORIGINAL SPARE PARTS

When downtime at your facility is not an option, choose genuine original equipment manufacturer (OEM) parts that you know you can trust for your pumps. Grundfos is the original equipment manufacturer for Grundfos branded pumps, including PACO, Yeomans, Chicago, Morris and Sewer Chewer.

Our spare parts and kits meet exact design specifications and are backed by rigorous testing, ensuring years of reliable service and the most efficient operation. Non-OEM or “will-fit” parts are not made to meet exact pump specifications and may cause sudden failures or expensive inefficiencies if they cannot handle application requirements. Don’t put your system operation at risk!

By choosing Grundfos genuine OEM parts, you can always be confident that the spare parts you install are engineered for optimal performance and reliability. This will keep your pumps and systems running smoothly, cost-effectively and efficiently for years to come.

WHAT GRUNDFOS ORIGINAL SPARE PARTS MEAN FOR YOUR SYSTEMS:

- ✓ Fewer surprises
- ✓ Greater reliability
- ✓ Increased efficiency

“In the case of equipment that originally had factory testing, the records allow 100% confidence that the OEM replacement parts will match the capability of the equipment as originally manufactured. Most often, the third-party item is at best a close approximation to the original design.”

GRUNDFOS

STOCK UP THE WAY YOU WANT

We've tailored our spare part solutions to suit all your system needs and requirements. With Grundfos Service & Solutions, you can stock up with the spare parts you need, the way you want — from single parts to large bulk orders. This means you have access to everything your systems require, no matter the application, challenges, pump types, location or organization size.

RECOMMENDED SPARES

When you buy a Grundfos pump or your warranty expires, we can provide a list of recommended spare parts for any sudden replacement needs. This will ensure you're prepared for any future maintenance or repair work, helping you prolong pump service life and save money.

 **ORIGINAL SPARE PARTS**

Grundfos spare parts can be purchased either with new pumps or as needed. Our spare parts are typically available for 10 years after production of the pump has been discontinued.

 **SERVICE KITS**

We strongly recommend you support the continued performance of your pump with one of our custom-made service kits. Our service kits are a one-stop shop to ensure you have all the spares you need on-site, so you can get your pump up and running again. Each kit is tailored for each pump and system, so you know exactly which parts to replace to help minimize downtime and future-proof performance. If the unforeseen happens in your pump systems, we're ready to assist with our pre-packaged service kits.

Visit our product selection tools, Grundfos Product Center and Grundfos Express, to find the spare parts you need.
